

The Same

The Smile

We don't need to fight
Look towards the light
Grab at it with both hands
What you know is right
Somebody's falling down
Somebody's telling lies
Simple ass motherfuckers
One mistake after another

People in the streets
Please, people in the street
Somebody's hearing voices
(Somebody's going down, down, down)
They're going down, going down, going down

People in the streets
Please, we all want the same
Please, we are all the same
Please, we all want the same
Please

We are all the same
We all want the same
We are all the same
