

One Look At You

The Smithereens

One look at you and I knew
That we'd be together
You disappeared and I thought
You were gone forever

On and on I see your face
Everywhere and every place
On and on I see your face
One look at you
And I can see everything

Then you appeared and I knew
I could love forever
You said to me we were lost
In a dream together

On and on I see your face
Everywhere and every place
On and on I see your face
One look at you
And I can see everything

You disappeared and I thought
You were gone forever
Then you appeared and I knew
I could love forever

On and on I see your face
Everywhere and every place
On and on I see your face...now
One look at you
And I can see everything

One look, look at you
One look, look at you
One look, look at you
One look, look at you

One look at you and I can see everything
