

Looking at earth like a jigsaw  
Wanna fuck it all up with a nail bomb  
It's not my imagination  
I gonna take you down son, I'm an alien  
Got a pee shooter loaded with titanium  
It's not my imagination, it's the real thing

I've been skating on the edge  
Of insomniatic dreams  
Some say that the world is ending  
Baby I don't wanna believe  
This is a new galaxy

Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation

I want a new home town up in Jupiter  
That makes my own place look kind of stupid but  
In my self-deviation  
It's the real thing  
Gotta go, gotta start up the engine  
And when I fly away I'm taking my pension  
It's my imagination  
It's the real thing

I've been skating on the edge  
Of insomniatic dreams  
Some say that the world is ending  
Baby I don't wanna believe  
This is a new galaxy

Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on, it's taking on

Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation

Is there anybody out there?  
Is there anybody out there?  
Is there anybody out there?

Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation

Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation  
New generation's coming on, it's taking on a new generation  
Cosmic electronica is taking on a new generation

New generation's coming on, it's taking on a new generation
