

All I Need (Is You Today)

The Sound

And wherever you were walking
And wherever you have been
I have never come across you
This is the face I've never seen
And I've been walking half a lifetime
And I have watched it pass me by
Don't you know it was enough to
Scare the stars out of my sky

All I need is you today
All I need is you today
All I need is you today
All I need is you today

And is there so much sea between us
Or only half a mile of road
Where in this world are you hiding
Or am I just too blind to know
Have I been searching half a lifetime
Or have I watched it pass me by
Either way it was enough to
Scare the stars out of my sky

All I need is you today
All I need is you today
All I need is you today
All I need is you today

All I need is you today
All I need is you today
All I need is you today
All I need is you today
