

Such A Difference

The Sound

It's made such a difference to me
The way that I talk
It's made such a difference to me
The way that I look
It's made such a difference to me
The way that I don't talk
It's made such a difference to me
But it's a difference you'll never have to see
It's made such a difference to me
But it's a difference you'll never have to see

Walk into the night with you
Until we're alone
What we're going to do
Everybody knows
Why am I telling the world, God knows
I don't know
It's made such a difference to me
But it's the difference that you'll never see
It's made such a difference to me
But it's a difference you'll never have to see

All I can say
It was really nothing
All I can say
It was nothing

Into the present tense
I get so hard
It's my last line of defense
Against all this world
Fighting fire with fire
Destroys what you are
It's made such a difference to me
It's the difference that you'll never see
It's made such a difference to me
It's the difference that you'll never see
You've made such a difference to me
It's the difference that you'll never see
I've made such a difference to me
It's the difference I hope you will never ever have to see
