

## Molecules

## The Spill Canvas

It still feels like I'm in a dream  
Ever since you anchored next to me  
All our molecules were made for this entanglement  
You complete my circuitry  
I was so stuck until you came  
Reminded me I even have a name  
All our molecules were made for this entanglement  
You bring my focus into frame  
These convictions were see through, til I met you

I used to be so afraid to feel  
Anything good or remotely real  
I never believed in the magical  
Until you came along  
And you lit up the world

Now nothing even comes close to you  
Evermore I do  
I believe in it cuz I want to  
Evermore I do  
Now nothing even comes close to you  
Infinitely evermore I do

On the subatomic level we align  
I want your ecstasy in my spine  
All our molecules were made for this entanglement  
Intertwine your soul with mine

These convictions were see through, until I knew

I used to be so afraid to feel  
Anything good or remotely real  
I never believed in the magical  
Until you came along  
And you lit up the world

Now nothing even comes close to you  
Evermore I do  
I believe in it cuz I want to  
Evermore I do  
Now nothing even comes close to you  
Infinitely evermore I do

I feel you on my left side  
I feel you on my right side  
I will do my part  
I'll show you my heart
