

## Benchmark

### The Starting Line

I built a bench  
Little place for you to rest  
Left a space to stamp our names  
Nothing getting in the way

Your own place to sit and breathe  
Partially in the sun  
Always half in the shade  
Never too warm

I did what I could  
Made this for you  
See what I can do  
Was always meant to  
You know how much it means to me  
Did what I could  
I'll see what I can do  
A small memento

Together, endless, together  
We can't go wrong  
Together, we'll make it together  
We can't go wrong  
Together, we're in this together  
We can't go wrong  
If I can  
I will

If I could do it all again  
Then I would not change a thing  
If I could do it all again  
I would

If I could give you everything  
I would  
If I could give you everything  
I would

I did what I could  
Made this for you  
See what I can do  
Was always meant to  
You know how much it means to me  
Did what I could  
I'll see what I can do  
A small memento

Together, endless, together  
We can't go wrong  
Together, we'll make it together  
We can't go wrong  
Together, we're in this together  
We can't go wrong

I make it my life's work to promise you  
This is your place  
Can I be

Just one small planet in your orbit please  
If I can  
I will  
If I can

Together, endless, together  
We can't go wrong  
Together, we'll make it together  
We can't go wrong  
Together, we're in this together  
We can't go wrong  
If I can  
I will

If I could do it all again  
I would  
I would
