

# Same Direction

The Streets

See me, I like to go my own way  
We both say goodbye but then walk in the same direction  
If she can't move on, that's her problem  
I'm good, that's her delay  
We both say goodbye but then walk in the same direction

Like owls in the night we're up so late  
A sympathy fiddle plays for love that's wasted  
Now is the time for a good idea  
In the middle of the night when no one's up to take it  
Two wavy ones getting done damage  
Soleil was her name like the sun in Paris  
The L was silent, the only thing about her that was  
From sundown till lunch  
I wink, I was joking if she snubs me  
I take it slowly, she wears it hell  
She's lit up smoking in the club  
But she drives too fast to care about her health  
She only listens to crud or house  
I'm only ever in the club or house  
Cigarettes she gave up just for loud  
I only wanna make

See me I like to go my own way  
We both say goodbye but then walk in the same direction  
If she can't move on that's her problem  
I'm good, that's her delay  
We both say goodbye but then walk in the same direction

You lean it to the car window  
Tell me the stars are getting off  
The sky moves back like tinted windows  
Revealing tomorrow like a deathly cough  
I tell no lies, it's easy to remember  
Pocket the keys from in my lap  
One too many blue lights flick on the dash  
Glow from electronic highs  
Smoke floats out and disappears  
You jump in the driving seat, make for the stick  
No joke now, we are on to our fears  
Bump up the song, hit the mirror on the door  
Make for a kiss and fatally floor it

See me I like to go my own way  
We both say goodbye but then walk in the same direction  
If she can't move on that's her problem  
I'm good, that's her delay  
We both say goodbye but then walk in the same direction

But we're now walking the same direction so girl please leave me  
Please leave me, please leave me  
Leave me, leave me

Please leave me, please move on  
Please leave me and carry on  
Please leave me, don't be weird  
Please leave me, you've just flopped

Please leave me, you're now dropped  
Please leave me, I need time  
Please leave me, you're in slime  
Please leave me with my music

We both say goodbye but then walk in the same direction  
We both say goodbye but then walk in the same direction

I never rate any gathering till the people have all settled  
To talk on the weather in the wet is a downer on the day  
We could debate this all afternoon and we would still not settle it  
But that is much better than us settling it without debating at all
