

# I Fall Hard

## The Strike

I been lonely  
I been lonely for some time  
Got one and only  
One and only on my mind

And I can't help it that I see your face in the dark of night  
And I can't help it that the way you move's got me so alive, yeah  
And there is something that I think you outta know by now, yeah  
So you won't let me down  
You won't let me down

When I fall  
I fall hard  
And when I love  
I love hard  
And I know that you could never do that to me  
Break my heart, you know it just might kill me  
Lower me down into my burial ground  
When I fall  
In love  
I fall hard  
I fall hard

Starts out slowly  
But it's wild like a desire  
And when you get so close to me  
Burns it like a fire

And I can't help it that I see your face in the dark of night  
And I can't help it that the way you move's got me so alive, yeah  
And there is something that I think you outta know 'bout now, yeah  
So you won't let me down  
You won't let me down

When I fall  
I fall hard  
And when I love  
I love hard  
And I know that you could never do that to me  
Break my heart, you know it just might kill me  
Lower me down into my burial ground  
When I fall  
In love  
I fall hard  
I fall hard

Do you wanna stay together?  
I'm trying to fight the end  
Oh tell me now  
Do you wanna stay together?  
I'm trying to fight the end

When I fall  
I fall hard  
And when I love  
I love hard  
And I know that you could never do that to me

Break my heart, you know it just might kill me  
Lower me down into my burial ground  
'Cause when I fall  
In love  
I fall hard  
I fall hard  
I fall hard  
I fall hard  
I fall hard
