

## The Getaway

## The Strike

"Oh I'm gonna be somebody someday just wait" is what I said  
The only question was when  
It's funny how we forget  
Every set of eyes was like a spotlight  
Shining down from the heavens  
We gave it everything we had  
Not the best but we weren't bad

I've been told that something's got to give but  
I've never been one to break  
I can still hear you say I know the road we're gonna take

And I know you will be riding  
Shotgun in my car for the getaway  
Cutting through the brake lights up ahead  
And even though all is lost  
I'm lost with you  
And I'm fighting  
Every step but I can't turn the page  
Still you say you trust me all the same  
And even though all is lost  
I'm lost with you

You say you can keep watch by road  
I'm pulling up when it's lights out  
A little late to turn around  
Save yourself when it goes south  
I can see the headlights in the distance  
Closing in on us now  
A voice above us calling down  
Both hands on the ground

They keep saying something's got to give  
But I've never been one to break  
Then I hear you say I know the road we're gonna take

And I know you will be riding  
Shotgun in my car for the getaway  
Cutting through the brake lights up ahead  
And even though all is lost  
I'm lost with you  
And I'm fighting  
Every step but I can't turn the page  
Still you say you trust me all the same  
And even though all is lost  
I'm lost with you

I'm lost with you but I  
I hope we never find our way  
I hope we never hit the brakes  
And even when all that we know  
Is in the rearview closing in  
I know that we can start again  
Get even closer to the edge

Cause I know you will be riding  
Shotgun in my car for the getaway

Cutting through the brake lights up ahead  
And even though all is lost  
I'm lost with you  
And I'm fighting  
Every step but I can't turn the page  
Still you say you trust me all the same  
And even though all is lost  
I'm lost with you

I'm lost with you  
And even though all is lost  
I'm lost with you
