

High

The Strumbellas

I wake up and close my eyes
You wake up and close your eyes too
And I would fall a thousand times
I would fall a thousand times for you

You make me high, high, high, high, high
You make me high, high, yeah, my, my

We can all get a little high
Help me up when I'm upside down
You make it sing when I just hear sound
With the world on my shoulders
We'll never get older
We can all get a little

Every story that we make
Takes me to a place I've never been
You will always be my heart
And I will always be your broken wings
You have been the only hero
In all the scattered voices I have heard
And you will always be the life
From all the forests I have burned

You make me high, high, high, high, high
You make me high, high, yeah, my, my

We can all get a little high
You help me up when I'm upside down
You make it sing when I just hear sound
With the world on my shoulders
We'll never get older
We can all get a little

More and more it feels like home, like home
When you are with me
More and more it feels like home, like home
When you are with me, are with me

We can all get a little high
We can all get a little high
You make me high, high, high, high, high
You make me high, high, yeah, my, my
We can all get a little high
You help me up when I'm upside down
You make it sing when I just hear sound
With the world on my shoulders
We'll never get older
We can all get a little
You help me up when I'm upside down
You make it sing when I just hear sound
With the world on my shoulders
We'll never get older
We can all get a little
