

## Fern Beard

### The Submarines

In the beginning, we all start as a tiny seed, then a tender sprout  
With water, light and the hope of love,  
We grow up towards the skies above

The streets of our towns like garden rows  
That reach so high in the cities glowed  
With climbing vines and tendrils strong  
The sun comes up and the sun goes down

We're gonna take this town back  
We're gonna take this town back
