

Simple

The Suicide Machines

This world is beautiful
If you don't put up a wall
Yes, it really is that simple
Don't let it boil your blood
So try and let it go
Let it go and move on
This world can make you hurt
But it can also make you love

It's never as bad, as bad as you think
The sun still shines, feels good on my face
It's never as bad, as bad as you think
The sun still shines on a new morning

So take all the good with the bad
All the push and the shove
There will always be a calm
Between all the storms
So don't get all hung up
On the small problems
Just know that you're not giving up
You're just moving on
So forgive quickly
And always kiss slowly
Love hard and love truly and always laugh uncontrollably and
Regret nothing, put a smile on your face
Because we all are born astride of the grave

Don't ever be afraid
Don't ever be afraid
And don't let it be too late

It's never as bad, as bad as you think
The sun still shines, feels good on my face
It's never as bad, as bad as you think
The sun still shines on a new morning
It's never as bad, as bad as you think
The sun still shines on a new morning
