

Don't Stop

The Sunshine Underground

The moment that you realized
A vision fell into your eyes
We could make forever feel so good
All realized all understood

I've always been open to that feeling
On and on, don't stop
The fear has gone, don't stop

When every colour looked so bright
You held your hands up to the light
You've been dancing around the room all night
What ever you say, what ever you like

I've always been open to that feeling
On and on, don't stop
The fear has gone, don't stop

We wont ever stop
Only life
Nothing else
To start again
