

Fever Running Loose

The Sweepings

In my place back East, falling to my knees
Floor beneath me so familiar
I've been miserable, I've been wanting more
Silly me still begging for you

Tell myself it could be better
Leave this all behind
I swear we had it all together
Nothing we can't weather
But that would be a lie

I can't wrap my head around this fever, fever
Poison in my veins when I'm with you
Gone too far and yet you take me deeper, deeper
Still there's nothing I can do
A fever running loose

Took it day by day but always just the same
Back and forth, we're going nowhere
Thought that you could change but you threw it in my face
I could never call this closure

Tell myself it could be better
Leave this all behind
I swear we had it all together
Nothing we can't weather
But that would be a lie

I can't wrap my head around this fever, fever
Poison in my veins when I'm with you
Gone too far and yet you take me deeper, deeper
Still there's nothing I can do
A fever running loose

Tell myself it could be better
Leave this all behind
I swear we had it all together
Nothing we can't weather
But that would be a lie

I can't wrap my head around this fever, fever
Poison in my veins when I'm with you
Gone too far and yet you take me deeper, deeper
Still there's nothing I can do
A fever running loose
A fever running loose

A fever
A fever running loose
