

Just Like That

The Sweepings

Now that I have found you dear my world stopped turning
Every moment better than the last before it
Can't believe you're with me
How could I have ever lived without this feeling
Freer than I've ever been
My missing piece is all you are, all you are to me

Just like that it's not enough
Just like that you fall in love
With every single breath, take me and all my mess
I'm falling

Here with you and only you our time is frozen
Locked inside your eyes I swear we could be floating
We don't need, the ground beneath

Just like that it's not enough
Just like that you fall in love
With every single breath, take me and all my mess

Just like that I come undone
Just like that I found the one
With every single breath, now until the end
I'm falling

Find me safely wrapped in your arms again
I need nothing, you are my everything

Just like that it's not enough
Just like that you fall in love
With every single breath, take me and all my mess
Just like that I come undone
Just like that I found the one
With every single breath, now until the end
I'm falling
