

When Winter Falls

The Sweepings

Season come, seasons go
Feelings fresh as the falling snow
Where we've been, come so far
Every year reminds us who we really are

Hold me close in fading light
Hold me close and close your eyes

Now, here, we have everything we need dear
Everything we want and more
Safe now, everything inside these hands show
How we have it all and more
When the winter falls, how we have it all

Oh my eyes, how they clear
To see the world while I hold you near
My hearts beat, how they tell
Of winters wind and the ringing of the bells

Stay with me in fading light
Stay with me don't say goodnight

Now, here, we have everything we need dear
Everything we want and more
Safe now, everything inside these hands show
How we have it all and more
When the winter falls, how we have it all
