

The Midas Touch

The Tangent

Where have you been my friend?
I've been waiting for so long just to see you
You put your face out through the clouds today
Lit my world with silver and brought joy to my heart

It's been a long time since Summer's gone
And I've been wondering if I dreamed all those bright days
Through this fog and rain and murk we've been living through
You start to doubt those memories of joy in this world

Welcome back my Winter Sun!

Days have been so dark now
That I wonder if you're really up above me
Making all the clouds shine on the other side
The one that I can't see

Get me a jet plane now
Gonna take off in the haze of the morning
And head out to the brightest point in the sky
Fill my head with sunshine
And put joy in my heart

Welcome back my Winter Sun
You give your Midas Touch to everyone
Welcome back my Winter Sun!
Follow refracted light and you will find a rainbow in every dew
drop
(In every single one!)
All of the ice and snow reflecting - all the vibrance of a Chri
stmas toy shop
(In every single one!)
Sunshine has the Midas Touch!

Sushine has the Midas Touch that I need right now
I'll give it a go but though I don't know how
Welcome back my Winter Sun!

So Where have you been my friend?
My God I've missed ya!
Under skies so dark and grey
You know I never doubted, that you'd be back again some day
