

# Tombstone

## The Temper Trap

Lions all around me  
Truth can be lies and the devil don't want you free  
Can anybody be  
My mind wanders around  
Though I'm caged oh let me out

Unmarked are the tombstones but the family still cares  
There were so many words I should've never kept

And oh, you got stuck in a spider's web  
But I'll cut you free  
And I'll cut you free  
And oh, as we stare at your wounds  
We're howling  
We're howling, we're howling for you  
We're howling for you

I saw what you saw but there was something else  
You know your love has bound your feet  
And you're casting shadows to deceive me  
I never knew how it could be  
I took a lot, I took once more  
I want to do something to show you to me  
Cause you know that no one really knows me

And oh, you got stuck in a spider's web  
But I'll cut you free  
And I'll cut you free  
And oh, as I stare at your wounds  
We're howling  
We're howling, we're howling for you  
We're howling for you

Unmarked are the tombstones but the family still cares  
There were so many words I should've never kept

I'll cut you free, I'll cut you free  
I'll cut you free, I'll cut you free

And oh, you got stuck in a spider's web  
But I'll cut you free  
I'll cut you free  
And oh, I stare at your wounds  
We're howling  
We're howling, we're howling for you  
We're howling for you

Unmarked are the tombstones but the family still cares  
There were so many words I should've never kept
