

Just Like I Told You

The Temptations

Show me what your love can be
So I can see the light for myself

Just like I told you love is here
And it's been waiting here for you
Just like I told you, never fear, yeah
You can believe that love is true

You know the road to heaven, yes
Has many bridges on the way
You live and learn to do your best
And see tomorrow in today

(And still we try) To make the best of this
(Can water hide) Ooh, from the deepest pit
Remember this, you're not alone
You're never far from home

Just like I told you love is here (I told you love is here)
And it's been waiting here for you (for you, for you)
Just like I told you never fear (I told you never fear)
You can believe that love is true (like I told you)

You try and dream a little dream
But life is keeping you awake
You wanna take a little chance
If they would give a chance to take, ohh

(And still we try) Yeah, to make the best of this
(Can water hide) Ooh, from the deepest pit
Remember this, you're not alone
You're never far from home

Just like I told you love is here (I told you love is here)
And it's been waiting here for you (for you, for you)
Just like I told you, baby (I told you never fear)
You can believe that my love is true (like I told you)

Just like I told you love is here (I told you love is here)
And it's been waiting here for you (for you, for you)
Just like I told you never fear (I told you never fear)
You can believe that love is true (you're everything in this world to me, you are)

(And still we try) Oh yeah, to make the best of it
(Can water hide) You hid me from the deepest pit, babe
Remember this, baby, you're not alone
You're never far from home

Just like I told you love is here (I told you love is here)
And it's been waiting here for you (for you, for you)
Just like I told you never fear (I told you never fear)
You can believe that love is true (like I told you)

Just like I told you love is here (I told you love is here)
And it's been waiting here for you (for you, for you)
Just like I told you never fear (I told you never fear)

You can believe that love is true (like I told you)

Just like I told you love is here (I told you love is here)

And it's been waiting here for you (for you, for you)

Just like I told you never fear (I told you never fear)

You can believe that love is true (like I told you)

Just like I told you love is here (I told you love is here...)
