

# Survive

## The Tide

Everything seems grey  
Going through another cold, hard day  
Never know who we are  
Never know who we are  
This life will change  
Everything's gonna be arranged  
Never know who we are  
Never know who we are

I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna, I'm just tryna  
I'm just tryna

What we don't inhale  
We don't struggle within ourselves  
Never know who we are  
Never know who we are  
Find strength in this hell  
Yeah you know only time will tell  
Never know who we are  
Never know who we are  
And I like to think that you'd always be there for me  
But now I know who you are  
Let em know who you are

I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna, I'm just tryna  
I'm just tryna

Everybody wants their own paradise  
If you need a little peace of mind  
Just know that everything will be alright  
Just know that everything will be alright  
Everybody wants their own paradise  
If you need a little peace of mind  
Just know that everything will be alright  
Just know that everything will be alright

I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna survive in this life  
I'm just tryna, I'm just tryna  
I'm just tryna survive in this life, yeah...
