

Cloud Across The Sun

The Treatment

Sooner or later (later)
You will make it back to where you belong
I tried to find you (find you)
But everybody said that you were gone
I came to see you
But you were just a cloud across the sun
But you were just a cloud across the sun

What do I do if lightning strikes me
And leaves me burning on the ground?
What do I do if the devil wants me
For what I've said and what I've done
I don't even know if I was ever right or wrong

Sooner or later (later)
You will make it back to where you belong
I tried to find you (find you)
but everybody said that you were gone
Come to meet me on the other side where we belong
But you were just a cloud across the sun

Do you remember by the river side
The sun was shining in your hair
I took a walk to where we used to live
Theres nothing left, forever gone
I don't seem to know if I even carry on

Sooner or later (later)
You will make it back to where you belong
I tried to find you (find you)
but everybody said that you were gone
I came to see you
But you were just a cloud across the sun
But you were just a cloud across the sun
Oh, a cloud across the sun

Have you noticed a change in me?
I don't think that you do
You should notice the change in me
But I don't feel that you do
That you do

Sooner or later (later)
You will make it back to where you belong
I tried to find you but (find you)
everybody said that you were gone
I came to see you
But you were just a cloud across the sun
But you were just a cloud across the sun
Across the sun, across the sun
A cloud across the sun
Across the sun, across the sun
A cloud across the sun
Will you always be a cloud across the sun?
Will you always be a cloud across the sun?
