

Together

The Troggs

The first night we met it was by accident
You looked at me and I knew what you meant
And we fell in love on the first night we spent together

We got up to dance cause we both liked the tune
I sensed you were wearing my favourite perfume
And we fell in love before we left the room
Together (Together)

(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you

Sometimes you look and you act like a child
You throw back your hair and you give me a smile
Then we love to love and love drives us wild
Together (Together)

(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you
(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you

There'll be ups and downs and there may be some tears
I'll always be there and we'll both share your fears
And our love will grow as we go through the years
Together (Together)

(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you
(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you

(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you
(I) I love you only and (I) always be true
(I) I'd be so lonely if I spent my life without you
