

## Don't Move

## The Twilight Sad

And I, I'll hurt you  
More than you will ever know  
And I, I want you  
More than you will ever know

We paired off in the violence  
We paired off in the violence  
So we were paired off in the violence

And I touch you  
When things are getting sore  
And I, I'll hurt you  
More than you will ever know, we won't find her

We paired off in the violence  
Paired off in the violence  
So we were paired off in the violence

You fit around me  
And you fit around me, we won't fight her  
You fit around me  
And fit around me, we glare overnight

You call when the leaves all fall  
Everybody's on sight but you are the violence  
You crawl to the windowsill  
Outside it's still, by the neck you hold us

We're all falling, we're all falling  
It's all fear and a lie

You crawl to the windowsill  
Outside it's still, by the neck you hold us  
You call when the leaves won't fall  
Everybody's unsafe, but you are the violence

And I, I'll hurt you  
More than you will ever know  
And I, I want you  
More than you will ever know, we won't fight her

We paired off in the violence  
We paired off in the violence  
So we were paired off in the violence
