

# It's Going To Happen

The Undertones

Happens all the time  
It's going to happen - happen - till your change your mind  
It's going to happen - happen - happens all the time  
It's going to happen - happen - till your change your mind

Best story I ever heard  
The truth about fat Mr X and the young girl  
See how far he'll let you go  
Before he persuades you when you're walking home

Happens all the time  
It's going to happen - happen - till your change your mind  
It's going to happen - happen - happens all the time  
It's going to happen - happen - till your change your mind

Watching your friends passing by  
Going to sleep without blinking a blue eye  
Too slow to notice what's wrong  
Two faced to you when you're taking them on

Happens all the time  
It's going to happen - happen - till your change your mind  
It's going to happen - happen - happens all the time  
It's going to happen - happen - till your change your mind

Everything goes when you're dead  
Everything empties from what was in your head  
No point in waiting today  
Stupid revenge is what's making you stay

It's going to happen - happen - till your change your mind
