

## Room 5

## The Unjust

The way you fooled the moon  
The virus you exhumed  
Open wide...

Even when you're all alone, Im your sun  
Even when you're not here with me, Waht have I become  
Even if you feel the same, when I'm around  
Even if the truth is spoken, What have i become.

My hand begins the tune  
The pain begins to bloom  
Open wide...

Even when you're all alone I'm your sun  
Even when you're not here with me, What have I become  
Even now there, and even then you're scared  
Now the times right, so realize its your time.

First time I seen you..  
I couldnt face the moment,, face the moment

It's the way you fooled the sun  
That feeling you've become  
The taste of broken sores  
Open wide...
