You're expecting one well here it comes. It's all been said it's all been done This world will never change So I hope it burns down.

You're expecting one well here it comes.

It's all been said it's all been done

Well fuck the government, fuck the world.

I hope it all burns down.

I despise the government

And nothing's getting solved

You think you're so fucking right

Well think once for yourself

[Chorus:]
Try all you want
Nothing's getting solved
False hope
Try all you want
Nothing's getting solved
False hope
You can try all you want
But nothing's getting solved
Try all you want
Nothing's getting solved
False hope

I have not changed my views
But every band reports the same news
So let them tell you punks not dead
Maybe they can get ahead
Is that the subject you wanna hear
Nothing's changed but the year
I don't wanna repeat someone else's lines.
That's such a waste of time.

[Chorus]

You can try all you want
But nothing's getting solved
You can try all you want
But nothing's getting solved
You can try all you want
But nothing's getting solved
You can try all you want
You can try all you want!!!!!!!!

[Chorus]
