

Gravity's Rainbow

The Used

Gravity's rainbow above me
A screaming tears across the sky
Tonight this evacuation is just
Theater, just pretend, just a lie
Who is that
On the other side of you
Last time that I counted 'twas just
You and I
Or will you grow a little shadow and
Step in line to follow
That scream stuck in the sky

Walking with the fire
Covered in flames, I'ma come out a survivor
Hot headed
Hot headed
Close the door on who I was
Walking with the fire I made peace with the light

Gravity's rainbow above me
A single tear drips from your eye
Somewhere the siren sounds cold through the night as we move
Single file in a line
So why would you leave me
Alone with these moments of love
So denied
Is there any reason why
We decide to follow
That scream stuck in the sky

Walking with the fire
Covered in flames, I'ma come out a survivor
Hot headed
Hot headed
Close the door on who I was
Walking with the fire I made peace with the light

Forever broken but at least these scars sing the same song
Forever broken but at least these scars sing the same song

Walking with the fire
Covered in flames, I'ma come out a survivor
Hot headed
Hot headed
Close the door on who I was
Walking with the fire I made peace with the light
