

I Hate Everybody

The Used

I hate everybody

All my friends are falling in love, but I can't even fall asleep

They keep telling me love is a drug, but it's a chemical that I need

I hate, I hate, I hate everybody

I hate, I hate, I hate everybody

I'm done with the night, I'm through with the day

I'm done with the light, there's no more I can say

I'm spinning out backwards from side to side

The body betrays me, it starts in the mind

La, la, I know a way to make the whole world go away

La, la, I know a way to make the whole world go away

All my friends are falling in love, but I can't even fall asleep

They keep telling me love is a drug, but it's a chemical that I need

I hate, I hate, I hate everybody

I hate, I hate, I hate everybody

I hate everybody

I hate everybody

I'm done with the thoughts, I'm done with the feels

Afraid of the dark so I live in the hills

I'm done burning bridges, I'm too scared to look

I'm sick of these memories, sick of your looks

La, la, I know a way to make the whole world go away

La, la, I know a way to make the whole world go away

All my friends are falling in love, but I can't even fall asleep

They keep telling me love is a drug, but it's a chemical that I need

I hate, I hate, I hate everybody

I hate, I hate, I hate everybody

I hate everybody

I hate everybody

I hate everybody
