

Idiot Creature

The Vapors

Well they're locking down fast and they're locking down slow
It's lockdown wherever you go
So you gotta stay home and you gotta lay low
God bless America

And you need to leave space of a metre or two
Don't shake hands or let them hug you
Cos the government thugs are all looking at you
So stand back America

If only my dreamcatcher could take them away
If only my dreams weren't the same dreams every day

Idiot creature
Idiot creature

Yeah they're locking down slow and they're locking down fast
But someone's forgotten their mask
So you better slow down, better let 'em go past
God bless America

And working from home isn't all that it seems
A nightmare in everyone's dream
So you'd better look sharp and you'd better look keen
So heads own America

It's a beautiful dawn breaking, it's a beautiful day
It's a beautiful feeling, but just don't get in my way

Idiot creature
Idiot creature
Idiot creature
Idiot creature

You want it, you got it
You sneeze it, you got it
You breathe it, you got it
Keep two metres from me

Idiot creature
Idiot creature
Idiot creature
Idiot creature

Well they're locking down fast and they're locking down slow
It's lockdown wherever you go
So you gotta stay home and you gotta lay low
God bless America

And you need to leave space of a metre or two
Don't shake hands or let them hug you
Cos the government thugs are all looking at you
So stand back America

Just look at that snow falling like little white lies
Just look at my skin crawling I'm not really surprised

Idiot creature
Idiot creature
Idiot creature
Idiot creature

God bless America
