

Embrace the Day

The Veer Union

There's no evolution
When the truth's what we avoid
There's no revolution
Only destroy, rebuild, destroy
We all point and blame the other side
We all fan the flame of the divide

Let's let blindness save us
Help us to see past the surface
Let's reverse this
Face the fire before it burns any higher
We must change this life
Embrace the day
We must bring this to an end
Embrace the day

Evading the illusion
Contained, controlled, conformed
Around we're bound, the cycle circling
Over and over and over and over and over again
Over and over again

Let's let blindness save us
Help us to see past the surface
Let's reverse this
Face the fire before it burns any higher
We must change this life
Embrace the day
We must bring this to an end
Embrace the day

We must stop this cycle we're in [x6]

Let's let blindness save us
Help us to see past the surface
Let's reverse this
Face the fire before it burns any higher
We must change this life
Embrace the day
We must bring this to an end
Embrace the day
We must bring this to an end
Embrace the day
Bring this cycle to an end
Embrace the day
Bring this cycle to an end
