

Savage

The Veronicas

How could you be just another savage
Leave me lonely, nothing left to salvage?
Nobody knows me better
Nobody knows me better
Nobody loved me better
Nobody loved me better

How could you be just another savage?
Was it love or collateral damage?
I could have loved you better
I could have loved you better
I should have loved you better
I should have loved you better
I should have loved you better
I should have loved you better

I spend a lot of time alone
A million scars and broken hearts to call my own
I can't believe that you made hurting me look easy
Swore to me that you won't ever let me go now
You go telling everybody I'm a psycho
But I already know that you're lying through your teeth
While you're lying next to me
Don't know how I didn't see what was hiding underneath

How could you be just another savage
Leave me lonely, nothing left to salvage?
Nobody knows me better
Nobody knows me better
Nobody loved me better
Nobody loved me better

How could you be just another savage?
Was it love or collateral damage?
I could have loved you better
I could have loved you better
I should have loved you better
I should have loved you better
I should have loved you better
I should have loved you better

How could you be just another savage?
Was it love or collateral damage?
I could have loved you better
I could have loved you better
I should have loved you better

And we're moving on
You can't be right if you do me wrong
You knew what it was when our tune just stopped
And you found yourself when the truth was lost
So prove me wrong
Got my jewellery on
But the bling on my ring finger's moved along
Lighting spliffs to hide the pain
I'd find it strange if we try again
Uh, got a mugshot, nice

Shoulda stayed away from my bloodshot eyes
'Round and 'round, it's a crazy game
The whole plan was you'd take my name
And now things change, don't stay the same
If it makes us stop, I'll take the blame
It must be new 'cause you've had enough of me
Now stuck in a loop 'cause you keep asking me how

How could you be just another savage?
Was it love or collateral damage?
I could have loved you better
I could have loved you better
I should have loved you better
I should have loved you better
I should have loved you better
I should have loved you better

How could you be just another savage
Leave me lonely, nothing left to salvage?
Nobody knows me better
Nobody knows me better
Nobody loved me better
Nobody loved me better
