

# Save Me

The Verve Pipe

Save me  
From the surface evergreen  
Save me  
From the roundabout routine

Lust is dining with the beast  
A secret that is kept but often beholden  
So save me  
I beg you save

Save me tonight  
The world is getting colder  
Your serum warm  
Is softening the pain  
Hypnotic breath  
And arms around my shoulders  
To lead me in

Save me  
There are bullets in the field  
Save me  
Cause I've been baptized, I've been healed

Poor boy, sins are not erased  
They're never ending haunting like a melody  
Save me  
I beg you save

Save me tonight  
The world is getting colder  
I've heard it said  
That peace is in the vein  
We take the bait  
With arms around our shoulders  
They lead us in

They lead us down  
The world is so much cooler  
(You are my light, my only one)  
The neon lights  
The tunnel through the vein  
(You are the moon, you are the sun)  
We acquiesce the weight upon our shoulders  
And find our way  
Find a way  
Find a way
