

Worrisome One

The Verve Pipe

Worrisome one, little worrisome one
These are worrisome times
And you worry sometimes
And though you sit on the sidelines
You could win the game next time
So smile and have fun, little worrisome one

I see who you are, inside a shooting star
Who's worried there's no way around the sun

So many little things it seems that your life brings
You gotta find your way around each one

Worrisome one, little worrisome one
These are worrisome times
And you worry sometimes
You're taking it so slow
'Cause you fear what you don't know
Move fast and have fun, little worrisome one

Don't sweat the little things
And you'll be strong for bigger things
Suddenly you're a superhero

My little man of steel, bad feelings that you feel
Disappear, there's nothing to fear, oh yeah

Little worrisome one, little worrisome one
Worrisome one, these are worrisome times
And you worry sometimes
And though you sit on the sidelines
You could win the game next time
There's a place in the sun, my worrisome one
Life should be fun, little worrisome one
