

# Tenement Light

## The View

You're bold, you're bright  
Tuck me in tight  
Turn me on like a tenement light

You're wrong, you're right  
You're false, you're true  
You're a knife in the head  
And I love you

So keep shining bright all through the night  
Shine above my head and aid my sight  
Style 'n' flare that no one can compare  
You live your life like a flick of that knife  
Dressed in black you ran away with the night  
And the scene was perfectly so unpolite  
Flicker at me like candle-light

I will wait for you  
Wait right here waiting for you

You tell me everything that's on your mind  
I'll tell you everything is gonna be fine  
You tell me everything that's on your mind tonight

You're bold, you're bright  
Screw me in tight  
I'm your bulb tonight  
You be my tenement light

Stand up and stare like my neck hair  
Was it a dare or did you just not care  
Don't go out in the middle of the night

And I will wait for you  
Wait right here for you

You tell me everything that's on your mind  
I'll tell you everything is gonna be fine  
You tell me everything that's on your mind tonight

So tell me you're happy  
Tell me you're sad  
Say you're not lonely  
I would never love to see you sitting in a lonely chair  
Sitting there scared

I will wait for you  
Be right here waiting for you

You tell me everything that's on your mind  
I'll tell you everything is gonna be fine  
You tell me everything that's on your mind tonight
