

Step Up

The Virginmarys

You'd better keep your mouth shut boy
Just keep it secret, keep it where I can see it
When there's danger, danger son
You keep it locked up inside

When strange things, stranger people stray the straight and narrow path
And these patients pay the price for no doctors as you calculate the maths

Hit the lights
Take the wheel
Avoid the track
No regrets
No way back

Wake up to raise the bar and step the fuck up
You're lost in the screams for more back up, back up
Kissing the truth to let it go
If you don't know now, you'll never know

You can get those things you don't deserve, manipulate them all
With these pictures paint one thousand words behind an iron wall

Hit the lights
Take the wheel
Avoid the track
No regrets
With no way back

Wake up to raise the bar and step the fuck up
You're lost in the screams for more back up, back up
Kissing the truth to let it go
If you don't know now, you'll never know

Wake up to raise the bar and step the fuck up
You're lost in the screams for more back up, back up
Kissing the truth to let it go
If you don't know now, you'll never know
