

## Already Dead

### The Virus

See the death on the horizon - We're already dead  
Don't open up yours eyes- We're already dead  
You know the end is coming soon- We're already dead  
Destruction and demise- We're already dead

So take a look around  
The world has fallen  
Problems everywhere  
Your life is stolen

We're already dead

See the rubble on the city streets- We're already dead  
Can't escape the aftermath- We're already dead  
Monuments of power at our feet- We're already dead  
A world torn in half- We're already dead

Leaders get what they want in vain-We're already dead  
A country torn by war-We're already dead  
And the children feel the pain-We're already dead  
So many victims of this horror-We're already dead

We're already dead, dead, dead  
We're already dead
