

Sunset Beagle

The Walters

You're my best friend from the start
Every weekend sneaking out after dark
You're the best friend that I could ever have

It's a long way down
Lost among the clouds
Such a long way now
There's no doubt
Those years will pull ya down
No more hiding out
You just need some time in the sun

Tell me what's the point in trying
When there ain't no compromise
Who am I to give you any advice?
There's no maybes if you're waiting
Only you can make it right
You can take it if you'd only decide

We were sleeping in the car
Breaking dishes in the back of the bar
We didn't know it, but those were the best times we had

Tell me what's the point in trying
When there ain't no compromise
Who am I to give you any advice?
There's no maybes if you're waiting
Only you can make it right
You can take it if you'd only decide

Tell me what's the point in trying
If you'll never compromise
Who am I to give you any advice?
There's no maybes if you're waiting
Only you can change your mind
You can take it and give it
Just one more try

It's a long way down
Lost among the clouds
Such a long way now
There's no doubt
Those years will pull ya down
No more hiding out
You just need some time in the sun
