

# The Beast Cures The Lover

The Wannadies

Here I am with luberon  
-my best friend  
My thoughts are spinning in and out of my empty head  
So is this our new world with too many people set to explode?  
Well that's what I've heard

Here I am trying so hard to express myself  
My eyes are wide open but my mouth is shut  
So please...let me believe that you're my desire

If you can, come with me  
The beast cures the lover  
Come with me, close your eyes  
The beast cures the lover

Here I am trying hard to be understood  
Some say "surrender", but I've already lost  
So please...let me believe that you're my desire  
You're my desire

If you can, come with me  
The beast cures the lover  
Come with me, close your eyes  
The beast cures the lover  
Come with me, close your eyes  
The beast cures the lover
