

# Sharks

## The Warning

There's something lurking in the water  
You better swim a little faster now  
You better be good, you better bring proof  
Because they're watching over you

Don't bleed, don't bleed  
Don't bleed, don't bleed

It's the meat that really matters  
The bones all end up falling out  
If you're gonna rot, then add to the plot  
Because they're always watching you

Don't bleed, don't bleed  
Don't, don't, don't

Couldn't be everything that you wanted me to be  
But you're keeping me close like an enemy

Help me now, how am I supposed to hide?  
Watch me drown, ripped to shreds under the light  
Sharks come circling, don't say anything, waiting for the teeth to bite you  
Shut your mouth, you know  
They're bleeding you out

Don't bleed, don't bleed  
Don't bleed, don't bleed

Violence only brings violence  
Keep quiet, put the muscle on  
You're stuck in your skin, there's no way to win  
You know they're always watching you  
If we only bring silence, all we'll ever be is good as dead  
When they got you surrounded, waiting to pounce in  
They're watching over you

Don't bleed, don't bleed  
Don't, don't

Help me now, how am I supposed to hide?  
Watch me drown, ripped to shreds under the light  
Sharks come circling, don't say anything, waiting for the teeth to bite you  
Shut your mouth, you know  
They're bleeding you out

Don't bleed, don't bleed  
Don't bleed, don't bleed  
Don't bleed, don't bleed

There's something lurking in the water  
You better swim a little faster now  
It's the meat that really matters  
Does it really matter?

Help me now, how am I supposed to hide?  
Watch me drown, ripped to shreds under the light  
Sharks come circling, don't say anything, waiting for the teeth to bite you

Shut your mouth, you know  
They're bleeding you out

Don't bleed, don't bleed  
Don't bleed, don't bleed  
Don't bleed, don't bleed  
You know they're bleeding you out
