

# Sinister Smiles

## The Warning

Hey, little girl, there's something you don't know  
You have nothing left but this body you control  
I'd walk away, but before I could start  
Sinister smiles shut me up and they open up their mouths to say  
Break, break, just break apart  
Break, break, just break apart

Hey, little girl, do you feel satisfied?  
Have you quenched the hunger that was still dormant inside?  
Trust when I say I won't let you get hurt  
But if I am to burn, then you will never get to  
Walk away from all the horrors  
And the pain that moves us forward  
You have just found out what it is like to live a lie

Both hands tied up  
Held hostage by the whispers that destroy  
My hands, your blood  
Won't let you win, but darling, you can barely take much more

Break, break, just break apart  
Break, break, just break apart  
Just break

You'll never admit you were born to be a pawn  
An innocent sinner, a guilty saint above all  
I'm not a fool, there's nothing left for me  
Do what they say or else there will be hell to  
Pay the price and grab the dagger  
Cut through skin and stain the water  
And for what it's worth, you'll never live until you die

Both hands tied up  
Held hostage by the whispers that destroy  
My hands, your blood  
Won't let you win, but darling, you can barely take much more

Break, break, just break apart  
Break, break, just break apart  
Break, break, just break apart  
Break, break, just break apart  
(Break, break) Just break apart  
(Break, break) Just break apart  
(Break, break) Just break apart  
(Break, break, just break apart)

'Cause I got both hands tied up  
Held hostage by the whispers that destroy  
My hands, your blood  
Won't let you win, but darling, you can barely take much more

Break, break, just break apart  
Break, break, just break apart ('Cause I've done no wrong)  
Break, break, just break apart (I have done no wrong)  
Break, break, just break apart (I have done no wrong)  
Break, break, just break apart (I have done no wrong)  
Break, break, just break apart

Break, break
