

# Unmendable

## The Warning

You all act so innocent  
You trick our minds to give in  
Into your life of sin  
You all play your little games  
You try to act and to pretend  
But we know you've killed lovers and betrayed friends  
Tears running down our face  
All of your words were always staged  
And you were always fake  
You were never nice to us  
Your lies were never good enough  
Like fools, we trusted you

Oh, you left and you killed what we had  
Oh, don't come close 'cause you stabbed us in our backs

When you're all alone with no one to hold  
Don't come near 'cause we won't be here  
You left us lost when we gave you our trust  
You left 'cause you chose them over us

You just waste our time  
We make amends and then we fight  
Silently, you start to lie  
This has become a war  
And you won't stop until we fall  
Until we're all gone

Oh, you left and you killed what we had  
Oh, don't come close 'cause you stabbed us in our backs

When you're all alone with no one to hold  
Don't come near 'cause we won't be here  
You left us lost when we gave you our trust  
You left 'cause you chose them over us

It's unmendable, for better or for worse  
You'll get what you deserve  
It's unmendable, for better or for worse  
You'll get what you deserve  
It's unmendable, for better or for worse  
You'll get what you deserve  
It's unmendable, for better or for worse  
You'll get what you deserve

When you're all alone with no one to hold  
Don't come near 'cause we won't be here  
You left us lost when we gave you our trust  
You left 'cause you chose them over us

It's unmendable, for better or for worse  
You'll get what you deserve  
It's unmendable, for better or for worse  
You'll get what you deserve
