

# Alive Right Now

The Weeks

I can't believe we're both alive right now  
On the same planet, how did that work out?  
Out of all the times and places  
Minutes wasted, wouldn't have you now

Can't believe we all made it here  
Stumbled safely through another year  
After everything that's happened lately  
The world's gone crazy, but you steered clear

I've been burned one last time  
No fault of mine  
Well, I shake where I stand  
My heart in hand  
Oh, heart in hand

I can't believe we're both alive right now  
Blinkin' eyes, breathin' in and out  
God knows half a million faces would take our place  
But it was us somehow

Still don't understand the air we breathe  
Still get terrified by swaying trees  
Always knowin' that one false wind could do us in  
And bring us to our knees

I've been burned one last time  
No fault of mine  
Well, I shake where I stand  
My heart in hand  
Oh, heart in hand

I can't believe how this ended up  
Pourin' liquor in a paper cup  
I'm just happy that you never waited  
Hesitated or left me stuck

I've been burned one last time  
No fault of mine  
Well, I shake where I stand  
My heart in hand

I've been burned one last time  
No fault of mine  
Well, I shake where I stand  
My heart in hand  
Oh, heart in hand
