

Two Moons

The Weeks

Oh look at me
Show me your hands and maybe I can get to know you better
Talking is cheap
I bet you say nothing and they all think you're real clever
Everything comes back in waves and the beauty it was frightening
Permanent smile
We sat for a while and it struck us both like lightning

Two moons desert stars and eyes
I was lost there I was hypnotized
I thought that nobody could see all of the things that I see
But she grabbed me by the hand
She started looking at me

When we were young
I bet we were better than we ever could remember
Probably more fun
Digging up worms with all our dreams of getting bigger
With air in our lungs
We talked about stars and how they're dead before they got here
Something that was gone for forever but it still shines so clear

Two moons desert stars and eyes
I was lost there I was hypnotized
I thought that nobody could see all of the things that I see
But she grabbed me by the hand
She started looking at me
We'll don't blink end up missing your life
Some are faster than the others so it's best not to try
Well cut your losses I can tell when I'm beat
Well I'd walk a million miles just to fall down at your feet

I was lost on a path
Couldn't find what I had
I was stuck in your head
Desert eyes looking back

I was lost on a path
Couldn't find what I had
I was stuck in your head
Desert eyes looking back

Two moons desert stars and eyes
I was lost there I was hypnotized
I thought that nobody could see all of the things that I see
But she grabbed me by the hand
She started looking at me
We'll don't blink end up missing your life
Some are faster than the others so it's best not to try
Well cut your losses I can tell when I'm beat
Well I'd walk a million miles just to fall down at your feet
