

## No History

The White Buffalo

I threw my dreams in the wishing well  
But it seems they all get lost in time  
But time don't fight fair  
It's simply unaware

I write myself a different story  
One that's filled with twists and turns and life is on fire  
Where I might get burned  
Pawn it off to a lesson learned

I feel when the future comes  
That there won't be a love for everyone

You can't hold the hands of time  
There's only here and now and nothing more  
There's only one way to be free  
No history  
No history

Memories, they come crashing in  
Living in the past is a waste of your life  
We can't rewind  
Leave it all behind

What if morning never comes  
Give your tomorrow out of today  
We're all gonna go  
When, nobody knows

I feel when the future comes  
That there won't be a love for everyone

You can't hold the hands of time  
There's only here and now and nothing more  
There's only one way to be free  
No history  
No history

You can't hold the hands of time  
There's only here and now and nothing more  
There's only one way to be free  
No history  
No history  
No history  
No history  
No history  
No history
