

Love

The Wind and the Wave

You're driving in your car
And you know that you are the broken few
But you never get that far
Cause the golden hues start pulling on you
Back and forth, in and out of waves
And when you start to doubt yourself, know it's okay cause

Love can make the difference
We all need some forgiveness
I pray if there's a god
She will guide me through the fog
Love can make the difference
My third eye had a vision
Of you and me together
We were dancing in the desert again

There's no such thing
As a perfect life
So please don't try
You gotta jump the gun and
Fall to pieces sometimes
Back and forth, in and out of waves
And when you start to doubt yourself, know it's okay cause

Love can make the difference
We all need some forgiveness
I pray if there's a god
She will guide me through the fog
Love can make the difference
My third eye had a vision
Of you and me together
We were dancing in the desert again

Round a fire, we were tired of always pushing through
Always tryna play it cool
There's no telling when, no telling how
But we're gonna make it, yeah we're going to

Love can make the difference
Love is my religion
I pray if there's a god

Love can make the difference
We all get some forgiveness
I pray if there's a god
She will guide me through the fog
Love can make the difference
My third eye had a vision
Of you and me together
We were dancing in the desert again
In the desert again
Dancing in the desert again
