

Remember all the boys
We were exiles from all around
And the family we found were like
Fireworks when we went out

Remember all those years
We kept our black suits by the door
Like a soldier, every week
Which friend will I be dressing for?

The magic of the universe
Wiped out by a virus
We were young
And we were cursed
Yeah we laughed until we burst
Yeah yeah yeah
Yeah yeah yeah

Remember all those years
They said we brought it on ourselves
And in the gallows of our minds
Some of us wondered that as well

Remember all those nights
The confusion when we kissed
I'd resigned to swim with fate
But didn't wanna pull you in

The magic of the universe
Wiped out by a virus
We were young
And we were cursed
Yeah we cried until we burst
Yeah yeah yeah
Yeah yeah yeah

And now I'm getting old
And the war was won with pills
The hollowed bars and hollowed faces
Have again begun to fill

The boys are back in bloom
I watch the sun fall on their skin
And they look just like the ones I thought
I'd grow old together with

The magic of the universe
Wiped out by a virus
We were young
And we were cursed
I wanna scream until I burst
I wanna scream until I burst
I wanna scream until I burst
I wanna scream until I burst
I burst, I burst, I burst
