

With You Not Here

The Zombies

Once we were close
Never apart
You always were the one who had my heart
I get so cold
Without your flame
I lie awake at night
And I call your name

With you not here
What is there
No feeling left beyond the tears
There's only an empty space
Where once we crowded our hopes
And shared all our dreams

Since you've been gone
I've missed you so
No matter how I try
I can't let go
I can't believe
You've gone away
The colour's faded now
The world is grey

With you not here
I'm left with
Only the will to disappear
And I don't know what else to do
Except to peer into the mist

And I will never say goodbye
The things we did
Remain with me eternally
Don't know where I go from here
'Cause there's really nothing clear
Beyond the tears

And the rain keeps falling
And the rain keeps coming on down
Oh the rain keeps falling
Like a refrain keeps coming around
And around and around

With you not here
I'm left with
Only the will to disappear
No rainbow to wrap around me as I
Peer into the mist

And I won't ever say goodbye
The things we did
Remain with me eternally
Don't know where I go from here
'Cause there's really nothing clear
Beyond the tears
