

Escaping Gravity

TheFatRat

Walk in the shadow land
Nobody's innocent
Hand to mouth we lived like demons
Stuck in the phantom zone
Lost in a thunder dome
Twilight ruled the day
We found the impossible
Now we're unstoppable
Taking off, the world beneath us
Strong under pressure
We'll make it together
Our universe will change

Freedom looking down a telescope
Starlight never been so beautiful
Whole world waiting for us, time to go
Escaping gravity
We'll be rising high above the rain
Sunset never going to be the same
Thunder calling us to outer space
Escaping gravity

Escaping gravity
Escaping gravity

Straight to the galaxy
Faster than sanity
Left behind a land forsaken
Black holes and meteors
Riding on shooting stars
Fearless like our dreams
We shoot down a satellite
Wings of a butterfly
Constellations recreating
Fighting for liberty
Raising the energy
Bursting at the seams

Freedom looking down a telescope
Starlight never been so beautiful
Whole world waiting for us, time to go
Escaping gravity
We'll be rising high above the rain
Sunset never going to be the same
Thunder calling us to outer space
Escaping gravity

Escaping gravity
Escaping gravity

Starlight dances in the silver of the night sky
Way above the clouds
We will be sailing high
Sailing high
Sailing high
Ouh

You and me we're gonna touch the stars
Find the center of the universe
New reality in front of us
Escaping gravity
We'll be rising high above the rain
Sunset never going to be the same
Thunder calling us to outer space
Escaping gravity

Escaping gravity
Escaping gravity
