

Monkeys

TheFatRat

You're alone in the jungle now
You want to make a fire but don't know how
You're alone in the jungle now
Trying to survive
You're alone in the jungle now
You want to make a fire but don't know how
You're alone in the jungle now
Full of stupid monkeys

Monkeys think they're really smart
Always knew it from the start
They came up science and arts
Covering their monkey parts
Monkeys are confused always asking why
Monkeys are scared they don't want to die
Monkeys pray to gods and then they fight
About whose god is right

You know it's just another monkey
You know it's just another monkey
You know it's just another monkey
You know it's just another monkey
You know you're just another monkey (ahum)
You know you're just another monkey
You know you're just another monkey (ahum)
You know you're just another monkey...

When you join the monkey choir (ahum)
When you learn what it's about
When you finally have the fire (ahum)
You can burn the jungle down

They're alone in the desert now
They want to make a fire but don't know how
They're alone in the desert now
Trying to survive
They're alone in the desert now
They want to make a fire but don't know how
They're alone in the desert now
And you're the stupid monkey

You know that you're really smart
Always knew it from the start
You have power you have heart
You could save the planet but
There are stupid monkeys everywhere
They don't give a heck no they don't care
Keep everything themselves they only share
Tears hope thoughts and prayer

And they run run around
Around around they run
So proud of what they own
And they run run around
Around around they run
Frightened to be alone
Yeah we run run around

Around around we run
So proud of what we own
And we run run around
Around around we run
But you know you're not alone
